

Description/Usage

- FDA Base includes all Type II and Type IV Drug & Veterinary Master Files (DMF/VMF) on file with the FDA, including corrections. It also includes all approved drug applications by the FDA. (NDA, ANDA, NADA, ANADA). European Certificates of Suitability issued by the European Directorate of Quality Medicines are also included.
- FDA Base is also integrated to work with the Directory of World Chemical Producers (DWCP), thus allowing searches from within the DWCP. This allows you to know immediately if the producer has a DMF, VMF or Certificate of Suitability on file for the raw material you want to source.

Scope/Coverage

Currently includes:

- More than 11,000 DMF's & VMF's & Certificates of Suitability
- Over 18,000 approved drug applications (NDA, ANDA, NADA and ANADA).

Search By

- Chemical name
- CAS number
- DMF, VMF, Certificate of Suitability or NDA Number
- Brand Name
- Holder or Applicant
